

Kissabel® - R203

The Tree

- TREE TYPE: Open tree
- VIGOR: Medium to high
- PRODUCTIVITY: Medium to Good
- BLOOMING TIME: 2 to 4 days before Golden
- HARVEST DATE: Between Braeburn and Fuji
- BI-ANNUAL BEARING: Low susceptibility
- TOLERANCE TO PESTS & DISEASES: Susceptible to bitter pit and gloeosporium

The Fruit

Presentation: "Elongated fruit with red skin and a yellow-green background. Fruit can develop russeting on cheek. In suitable growing conditions, R203 develops an intense red flesh coloration contrasting nicely with the flesh remaining white."

Eating Quality: "Balanced taste, aromatic, and juicy. Slightly acidic at harvest. "

Storage Ability: "3 months in normal air atmosphere. Tests are in progress for CA storage potential. Tendency to develop internal browning has been reported"

Highlight

"R203 is an attractive fruit with a good area of overcolor, a distinctive shape, and a nice flesh color. It can develop russeting on cheek depending on the growing conditions. The taste is good with a hint of acidity at harvest, but it gets more balanced and aromatic after storage"
